Star America Team Successfully Reaches Commercial Close for the Portsmouth Bypass Project

New York, December 5, 2014 –Star America is pleased to announce that its team, the Portsmouth Gateway Group, has reached Commercial Close with the Ohio Department of Transportation (“ODOT”) for the Portsmouth Bypass Project. We will continue to work ODOT to reach financial close in early 2015.

The Portsmouth Bypass is a four-lane, divided, limited-access highway around the City of Portsmouth in Scioto County, Ohio. The project will be the largest construction project in Ohio’s history and ODOT’s first Public-Private-Partnership. Star America was previously named the Apparent Successful Proposer for the Portsmouth Bypass Project in September. Construction of the project is anticipated to begin in 2015.

About Star America

Star America Infrastructure Partners, LLC is a US headquartered developer, investor and manager of greenfield, North American infrastructure assets, focusing on public-private partnerships across the transportation, social and environmental sectors. Star America focuses on high value added projects where the team leverages its construction and asset management experience to generate attractive risk adjusted returns.
